

superior automation and electrical solutions.

Afrilek

Afrilek provides complete **automation** and **electrical solutions**, as well as service and support for production facilities. Afrilek brings a fresh and innovative approach with the ability to provide a full turnkey solution. Our goal is to exceed the expectations of every client by offering outstanding customer service, increased flexibility, and greater value, thus optimizing system functionality and improving operation efficiency. Our engineers are distinguished by their functional and technical expertise combined with their hands-on experience, thereby ensuring that our clients receive the most effective and professional service.

As solution providers in **industry**, Afrilek is involved in every stage of the project lifecycle from implementation to completion offering continual functional and technical support.

Our extensive skills encompass all aspects of implementation and operation. We provide the following services:

Projects

- Engineering
- Procurement
- Management
- Installation
- Commissioning

Support & Services

- SLA
- Remote support
- Training
- Technical Auditing
- Plant maintenance and calibrating
- Consulting

Product Distribution

Panel Manufacturing

- MCC's
- PLC and Remote IO Panels
- Server Cabinets
- Distribution
- Starter
- VSD
- HV/MV/LV Switchgear
- Batteries & Battery Chargers

Power Management

- Solutions
- Power Management Systems
 - Monitoring
 - Archiving
 - Reporting (KPI's, Billing)

Afrilek

CORPORATE PROFILE

Afrizlek

superior automation and electrical solutions.

Instrumentation, Control and Analyzers

- Supply
- Installation
- Commissioning
- Design
- DCS, PLC, SCADA & Field Equipment

Training

- Programmable Controllers (From Basic to Advanced)
- HMI (Operator Panels)
- SCADA
- DCS
- Variable Speed Drives
- Switchgear
- Customized maintenance training

Variable Speed Drives

- VSD panels
- Design and engineering
 - Pumps, fans, mills, crusher, conveyors systems,
 - Stacker and reclaimers
- Plant specific training and plant maintenances.

CORPORATE PROFILE

Afrizlek

superior automation and electrical solutions.

Afrilek

Afrilek possesses control system solutions in the following industries:

- Cement
- Food & Beverage
- Mining & Minerals
- Petrochemicals, Oil and Gas
- Power
- Steel
- OEM's
- Sugar industry
- Paper & Pulp
- Water and Waste water

We service a wide range of clients not only in South Africa but throughout Africa. We pride ourselves on our proven track record for effectively delivering multiple implementations. This is due to effectively directing team members in the development of software modifications to ensure that all requirements are met within budget restraints and time schedules.

To minimize risk to our clients, our solutions are extensively tested at our offices with our clients to make sure that all the requirements have been met before any installation commences on site.

In order to meet the individual needs of clients, Afrilek maintains a wide range of qualifications. Our company pride ourselves in working in accordance with ISO 9001.

We excel in various control systems. With our extensive knowledge base and experience in a host of different SCADA systems, interfacing PLC systems with the SCADA Systems is made easy.

Moreover, our functional and technical experience extends to interfacing with third-party software. At Afrilek we are continually expanding upon our knowledge and services to assist clients with successfully implementing Automation Systems in multiple industries throughout various locations.

Exceptional functional and technical expertise coupled with extensive industry knowledge makes Afrilek the ideal choice for a System Integrator for the implementation of your Automation System.

Apart from the Automation spectrum we have a good complement **of electrical competence**. Our experienced staff offers service and support for both disciplines i.e.

CORPORATE PROFILE

Afrizlek

superior automation and electrical solutions.

Automation and Electrical systems:

Low Voltage Systems

- Design
- Build and assembly
- Testing both FAT and SAT
- Commissioning and Integration

Consulting and Implementation

- Networks Design
- Automation Systems Upgrade

Service and Support competence with:

- PLC service and support
- VSD's
- Intelligent Overloads
- ACB's
- Network Audits for RS485, ETHERNET, FIBRE networks
- Power Management Software Integration
- MV & LV electrical systems design
